SUMMARY

Computer Science undergraduate building Java/Spring Boot services and AWS-hosted automation tools. Built a REST API supporting 1,000 requests/second and reduced manual model evaluation time by 60%.

ACHIEVEMENTS

- **Google Big Code 2026** - Ranked among the **Top 100** participants.
- **OpenAI x Outskill** - Placed in the **Top 50** with a **78/100** score for independently developed VibeBench.
- **Smart India Hackathon 2025** - Qualified as a **National Grand Finalist** with a loan-verification team.
- **GDG VIT Vellore** - Secured a **Top 10** national team finish by building Sherlock, an evidence-analysis platform.
- **CodeChef** - Earned a **2-star** rating in competitive programming contests.

PROJECTS

URL Shortener API | *Java, Spring Boot, MongoDB, Redis, Maven* GitHub

- Built a **Spring Boot REST API** supporting **1,000 requests/second** with Redis caching and MongoDB persistence.
- Reused URL mappings to prevent duplicates; implemented **HTTP 308 redirects** and click analytics.
- Throttled creation to **5 requests/minute/IP**; checked collisions and returned **400/404/429/500** error responses.

VibeBench | *Python, FastAPI, Docker, AWS EC2, React, SQLite* GitHub

- Reduced manual model evaluation time by **60%** by automating code generation and testing as the sole developer.
- Ran **2–8 minute** asynchronous Docker jobs on **AWS EC2** with CPU/RAM limits, **HTTP 202**, SSE logs, and cleanup.
- Scored **5 dimensions**: accuracy **40%**, quality **20%**, realism **15%**, security **15%**, and cost/latency **10%**.
- Enforced **3 validation gates**, assigning a **zero score** to empty or failed benchmark runs.

Sherlock | *Java, Spring Boot, JavaFX, Neo4j, REST APIs* GitHub

- Connected evidence in **Neo4j** graphs, contributing to the team's **70% reduction** in SRE investigation time.
- Developed the **Spring Boot backend**, case chat APIs, and **JavaFX client** for the team's AI investigation platform.
- Linked case workflows to **168 entities** and **222 relationships** extracted by the team from a **100,000-word corpus**.
- Collaborated on AI integration; team pipeline processed **500 KB** in **about 3 minutes**; graph queries took **7–8 seconds**.

GridCam | *Java, CameraX, TensorFlow/Keras, MobileNetV2, LiteRT* GitHub

- Implemented MobileNetV2 classification of **4 composition classes** with **321 training** and **91 test images**.
- Exported the model to **LiteRT**; integrated CameraX preview, capture, and analysis with latest-frame backpressure.
- Scheduled inference every **1.5 seconds**, displaying composition grids above a **60% confidence threshold**.

EXPERIENCE

OpenAI Sep 2026 - Present
Campus Lead Aditya University

- Trained **55+ students** in AI tools, resume tailoring, and internship research at a campus workshop.
- Created a reusable resume-building skill and hosted a software engineer guest speaker.

Unstop 2025 - 2026
Campus Ambassador

- Ranked among the **Top 6 Campus Ambassadors** for connecting students with hackathons and career opportunities.
- Earned **Tata Group recognition** for student outreach supporting the Tata Imagination Challenge.

TECHNICAL SKILLS

Languages: Java, Python, C++, SQL, JavaScript
Backend: Spring Boot, Spring MVC, Spring Data JPA, Hibernate, JDBC, FastAPI, Microservices
Web & Integration: REST APIs, SOAP, WebSockets, API Design, Asynchronous Programming
AI/ML: LLMs, RAG, LangChain, LangGraph, Prompt Engineering, PyTorch, TensorFlow/Keras, Hugging Face
Cloud & DevOps: AWS (EC2, S3, EKS), Docker, Kubernetes, Terraform, CI/CD, Linux, Git/GitHub, Maven, Postman
Databases & Caching: AWS DynamoDB, PostgreSQL, MySQL, MongoDB, Redis, Neo4j, SQLite
Core CS: Data Structures & Algorithms, OOP, DBMS, Operating Systems, Computer Networks
Engineering: System Design (HLD/LLD), Distributed Systems, Design Patterns, Unit Testing (JUnit), Agile/Scrum

EDUCATION

Aditya University Aug 2024 - Apr 2028 (Expected)
B.Tech in Computer Science (AI & Machine Learning) | **CGPA: 8.07/10** Surampalem, India

- **Cloud Infrastructure minor:** 32 credits across 10 courses in Cisco, Red Hat, Oracle, AWS, and Microsoft technologies.
